Datasheet for #sb343 DN

Recommendations:

Please read the starter kit user manual (at least installation chapter 5), if available, and have a look at the FAQ at http://www.alpeslasers.ch/alfaq.pdf

WARNING: Operating the laser with longer pulses, higher repetition rate, higher voltage or higher current than specified in this document may cause damage. It will result in loss of warranty, unless agreed upon with Alpes Lasers!

WARNING: Beware of the polarity of the laser. This laser has to be powered with negative bias on the laser contact (= bonding pad, corresponding to the label “laser” on the LLH) and the positive bias on the base contact (= submount, corresponding to the label "base" on the LLH).

Figure 1: Support mounting for #sb343 DN (please note that the laser is connected to the DN pad drawned in blue)
Figure 2: peak voltage and average power vs peak current at 2% duty-cycle (50ns pulses on the laser, 2.5µs period) (the solid squares indicate the maximum singlemode emitted power)

Figure 3: peak current and average power vs LDD voltage at 2% duty-cycle (50ns pulses on the laser, 2.5µs period) (the solid squares indicate the maximum singlemode emitted power)
Figure 4: spectra at 20°C for various LDD voltages (22ns pulses, 1.1us period)
Figure 4: spectra at 20C for various LDD voltages (monomode range)
