Recommendations:

Please read the User Manual and have a look at the FAQ at http://www.alpeslasers.ch/?a=142

WARNING: Operating the laser with higher current or voltage than specified in this document may cause damage and will result in loss of warranty, unless Alpes Lasers has permitted to do so!

WARNING: Beware of the polarity of the laser. This laser has to be powered with negative bias and positive bias on the specific zones drawn below. To use with an ILX Lightwave LDX-3232 laser driver, or equivalent.

Figure 1: Support mounting for #sbcw7502 DN (please note that AlN submount numbering is A0114)
Figure 2: Output power as a function of the singlemode emission frequencies and temperatures

Figure 3: Applied DC current as a function of singlemode emission frequencies and temperatures

Table 1: Singlemode optical output power as function of operating parameters.

Note: at -30\( ^\circ \)C: \( I_{th}=0.07\)A / \( V_{th}=9.8\)V (2-wires measurements). Maximum operation current: 0.10A for all temperatures.
Figure 3: Spectra at different temperatures for various DC currents.
